

BRITA Faucet Filter Certified to Reduce Lead in Drinking Water

What's in your box

- A Filter Cartridge
- B Filter Base
- C Adapters (you may or may not need one of these)
- D Rubber Washers (these match up with the adapters)

Adapter Installation

Every sink faucet has a round tip at the end that can be removed. Unscrew and remove it. If your faucet has threads on the OUTSIDE, you will not need an adapter or rubber washer. If your faucet has threads on the INSIDE, you will need to use one of the adapters.

Try out the different adapters (C) to find the one that best fits your faucet. Once you find the best fit, put the rubber washer (D) on the adapter and screw the adapter onto your faucet.

Filter Installation

Step 1

Place the filter base (B) under your faucet with the cartridge cup to the left of your faucet. Twist the mounting collar onto the faucet and tighten by hand. Do not over tighten or use pliers.

Step 2

Place your hand under the filter base cartridge cup. With the filter cartridge (A), align the pegs on the bottom of the cartridge with the holes in the cartridge cup and push down until you hear a click.

Using your filter

There is a white filter handle on the right side of the filter base. Move the handle towards the Brita logo (front of the base) to use the filter. Only run COLD water through the filter at all times.

When you use your filter for the first time ONLY, run cold water for five minutes. After that, your filter is ready for use whenever you turn on your faucet. You will not need to run the water everyday for five minutes through your filter.

Filter Settings on the Filter Base

Filtered Water – Brita water drop symbol in front of the filter base handle.

Unfiltered Water Stream – Single water drop symbol in the middle of the filter base handle.

Unfiltered Water Spray – Three water drops symbol behind the filter base handle.

When should you use filtered or unfiltered water?

Cold Filtered Water

- Drinking
- Cooking
- Making baby formula
- Rinsing fruits and vegetables
- Brushing kids' teeth
- Pets water bowls

Unfiltered Water

- Washing your hands
- Washing dishes, clothes
- Cleaning floors, countertops
- Showering or bathing. Adults, children and pets should avoid swallowing the water.
- Brushing adult's teeth

Changing your filter

Each time you use your filter, a light will flash on the front six times.

Green - your filter is working

Green and Red - your filter is working, but you will need to change it soon.

Red - It is time to change your filter. Press the filter cartridge release button at the back of the filter cup and pull the cartridge up. Revisit step 2 of filter installation to place a new cartridge in the filter cup.

Removing your filter

Should you need to remove your filter unit, simply unscrew the filter mounting collar from the faucet.

Use a filter certified to reduced lead in water. Look for the certification number, NSF Standard 53, if you're buying a filter. It is important to follow directions recommended by the manufacturer. Visit the Berrien County Health Department website at www.bchdmi.org to learn more.
